

DATASHEET

GMS – VIRTIGO

MAIN FEATURES

- ▶ Real time verification of cardholders via visual monitoring
- ▶ Photos display as cardholders pass through access points
- ▶ Configure how long photos are displayed
- ▶ Automated scrolling photo display
- ▶ Retain photos of interest as long as required

PACOM GMS is the perfect multi-site security management platform, providing integration between access control, intrusion, video, intercom, and virtually any building management or security solution.

PACOM GMS VIRTIGO

PACOM GMS Virtigo allows GMS operators to visually identify and authenticate personnel moving through access points at a site. Virtigo adds an additional level of security and helps operators identify unauthorised entry to your site.

As an access card is used, Virtigo displays the cardholder's name and photo on the workstation. Operators can check the photo to easily verify that the person using the access card is the registered cardholder. The visual verification enables operators to quickly challenge unauthorised visitors and ensure that no one's entering your site without proper identification.

Using Virtigo, operators can:

- Monitor a scrolling display of cardholder photos
- Match users to the registered cardholder's photo
- Hold any photo for further analysis for as long as required, whilst other photos continue to scroll
- Monitor multiple access points from their workstation
- Monitor any access point from one or more workstations on the network

FEATURES

Easy to install and configure

Install and configure Virtigo viewer UI component separately on each operator's workstation

Install and configure GMS Events Publisher and Virtigo Listener component on a single computer/server on the network

Monitor each access point from one or more workstations

Simple, uncomplicated operation - match the cardholder to the photo displayed on the workstation

COMPATIBILITY

GMS: GMS 4.20 or later

License: GMS API License

PRE-REQUISITE

Software: .Net Framework Version 4

ORDERING INFORMATION

| PART NUMBER | TYPE CODE | DESCRIPTION |
|-------------|-------------|---|
| 100 041 001 | GMS-BASE | GMS 4.0. Starter kit including media and license file for one server, 5 PACOM Controllers |
