

## DATASHEET

### UNISON VIDEO – COMMEND INTEGRATION

#### MAIN FEATURES

- ▶ Any door can be linked with an intercom station to enable remote unlock to valid users
- ▶ Ability to create an intercom queue to ease the handling of multiple call requests
- ▶ Can trigger a camera to display on a specific monitor in response to an intercom call
- ▶ Unison workstation can operate as a 'virtual' intercom station

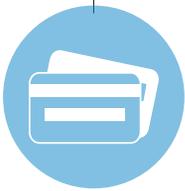

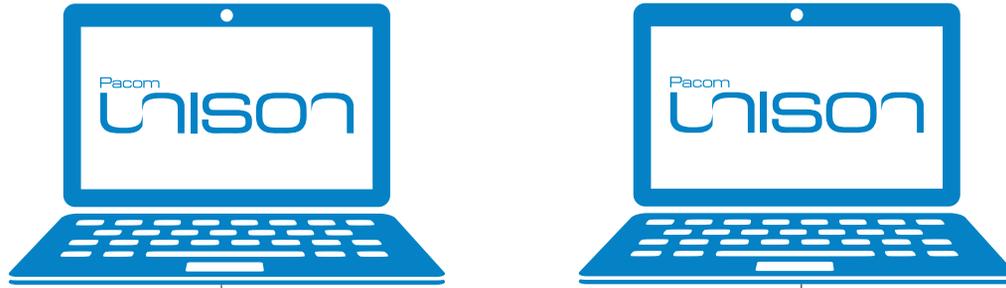

***Unison is a market leading platform with the ability to link intercom with alarms and other events in an efficient way. Unison uses the latest technology and offers a powerful and user friendly solution that suits all types of businesses and organizations.***

#### PACOM UNISON

Unison supports multiple intercom systems and brings them together in a single unified user interface. The intercom integration and operator interactivity is configurable to cater to different applications and to streamline the desired workflow. In environments with many intercom stations, the Unison software can be configured to queue the calls. This enables the operator to respond to multiple requests in a speedy and methodical manner. If less frequent calls are expected or if there are special circumstances, the Unison software can be programmed to respond differently. For example, if there is an emergency, an alarm can be generated and the intercom call can be automatically answered once an alarm is acknowledged by the operator.

#### COMMEND GE200/GE300/GE700/GE800/IS300/SIS

Commend develops and manufactures Security and Communication systems for protection of people, buildings and values. The Commend International GmbH was founded in 1971 and is one of the world's largest providers of Intercom Systems. Commend products and solutions are long term investments, because they can be expanded and upgraded.

## DESCRIPTION

Commend offers several intercom systems, including the older system GE200 and GE700 its successor, and the newly launched systems GE300 and GE800. GE700 is microprocessor controlled and can support up to 5760 users. The system can be linked to other intercom servers which provide support for up to 30,000 users. GE300 and GE800 are the IP servers to which all of Commend's analog and digital stations can be connected. The system is scalable and grows with the user's increased needs.

## COMPATIBILITY

Unison Version 5.8

Commend GE200 / GE700

Commend GE416/GE500/GE501

Commend GE300 / GE800

Commend GE700 – Pro 06.0 Version PRELIMINARY 0.3/0308 Document: PM-Pro060-EN-V10-0308

Commend GE501 - Commend Block Protocol with PC 02 - Version 1.0/1197

Commend SIS / IS300

## ORDERING INFORMATION

PART NUMBER	TYPE CODE	DESCRIPTION
110 001 001	USN-STD	Unison Standard. Includes support for one Unison client workstation.
110 001 002	USN-ENT	Unison Enterprise. Includes support for one Unison client workstation.
110 002 006	USN-ICM	Unison Intercom Module. Includes support for 25 intercom units.
110 003 006	USN-ICM-25	Unison license for 25 additional intercom units.
