DATASHEET

UNISON VIDEO – MILESTONE XPROTECT INTEGRATION

MAIN FEATURES

Received in Unison Client

▶ Alarms from motion detectors
▶ Communication is interrupted with server/switch
▶ Alarm/disarm/disconnect external inputs and outputs

Managed from Unison Client

▶ Switch camera to a specific monitor
▶ Switch camera to video system client
▶ Switch video from a camera to a specific screen in case of event
▶ Play live video
▶ Play recordings
▶ Send PTZ commands

**Support for automatic upload of configuration to Unison.**

Unison is a market leading platform with the ability to link video with alarms and other events in an efficient way. Unison uses the latest technology and offers a powerful and user friendly solution that suits all types of businesses and organizations.

PACOM UNISON

Unison cleverly acts as a "bridge" between video and other sub-systems. Video from a camera located at the alarm point is automatically controlled by Unison, making an alarm easy to verify. This allows the operator to take immediate action and to focus on relevant surveillance images. Unison has support for automatic upload of configuration data. When integrating with a video system, the task of manually programming hundreds, if not thousands, of different objects is time consuming, repetitive and tedious. Unison intelligently uploads the configuration minimizing data entry and programming errors and significantly speeding up commissioning.

MILESTONE

Milestone Systems A/S is the world leader in network-based software for digital video surveillance. The software is based on an open standard and supports more than 2000 different network-based camera models. Milestone Systems has more than 100,000 installations worldwide and an extensive distribution channel with authorized partners in more than 110 countries. The headquartered is located in Denmark and the company has approximately 390 employees. The company also has subsidiaries and sales offices in other countries.

3rd Party Access Control System   3rd Party Alarm System   3rd Party Fire System   3rd Party Intercom System   Milestone Video System   3rd Party Keys and Assets

DESCRIPTION

XPROTECT ENTERPRISE

XProtect Enterprise is advanced IP video management software designed for medium and large installations, primarily multi-site, multi-server installations. It provides operators with an efficient way to manage the entire monitoring system,including viewing an unlimited number of cameras, control access to entrances and create a basis for evidence. XProtect Enterprise is quick and easy to install and manage. XProtect Enterprise has powerful features such as configuration wizards and auto-detection of hardware. This will significantly reduce the time and cost of installing large systems.

XPROTECT CORPORATE

XProtect Corporate is a powerful IP video management software designed for large-scale installations in different geographical locations. It supports an unlimited number of cameras, users and sites. XProtect Corporate provides you with a high sense of security in high security installations. Local storage on the camera's memory card combined with failover functionality and redundancy on the management server ensures that video recording is never interrupted and that access to the system is always maintained.

XPROTECT EXPERT

XProtect Expert is advanced open platform IP video management software (VMS) for medium and large installations. Its powerful central management interface allows large systems with multiple Recording Servers to be efficiently managed as one uniform system. Using scheduled and event-driven rules, it is easy to automate security actions and control external systems, reducing the amount of manual tasks. Ideal for daily users and operators who want sophisticated live monitoring, XProtect Expert has efficient alarm handling and the ability to flag suspicious incidents for later review.

COMPATIBILITY

Milestone Xprotect Corporate v5.0c, Milestone XProtect Corporate 2014 v7.0b (with two integrated Enterprise Servers)

Milestone XProtect Expert 2014 v7.0b, Milestone XProtect Expert 2016 R3 v10.2a (as of Unison version 5.8.3)

Milestone Xprotect Enterprise 2014 v8.6b

Unison Version 5.8

ORDERING INFORMATION

PART NUMBER	TYPE CODE	DESCRIPTION
110 001 001	USN-STD	Unison Standard. Includes support for one Unison client workstation.
110 001 002	USN-ENT	Unison Enterprise. Includes support for one Unison client workstation.
110 002 005	USN-VCM	Unison Video Module. Includes support for 25 cameras.
110 003 005	USN-VCM-25	Unison license for 25 additional cameras.
