

DATASHEET

UNISON KEY CABINET MANAGEMENT – TRAKA INTEGRATION

MAIN FEATURES

- ▶ Manage all your valuable keys and assets from a single user interface
- ▶ Assign access to individual keys and fobs
- ▶ Raise an alarm in Unison when a key is pending and has been returned late
- ▶ All events and alarms appear in the Unison event log
- ▶ Generate reports that outline all key activity
- ▶ Ability to set temporary access restrictions while using a key

Support for automatic upload of configuration data

PACOM Unison provides you with an unparalleled graphical user interface for managing all your security and building needs in one easy to use solution. This includes management for intrusion detection, access control, fire systems, video management and verification, intercom management, building controls, and keys and assets.

PACOM UNISON

With large amounts of information from different applications, it is crucial to use a system that offers a simple and intuitive user interface. This allows the operator to respond to various types of events in a fast and secure manner. In a powerful way, Unison presents information from different sub-systems in a common user interface. Unison is a Windows-based client / server system with a graphical layout that can be recognized from the traditional Microsoft Office environment.

Unison's ease of use is highlighted by the large amount of graphical features supported by the system. CAD drawings can be imported and icons can be placed in different layers of the drawing to symbolize devices like cameras, intercoms and card readers. The graphics make the system user friendly, reduce training requirements and minimize the risk of incorrect decisions. When integrating with a fire, intrusion or other subsystem, the task of manually programming hundreds, if not thousands, of different objects is time consuming, repetitive and tedious. Unison intelligently uploads the configuration minimizing data entry and programming errors and significantly speeding up commissioning.

TRAKA INTEGRATION

Originally, the manufacturer of one of the world's first electronic key management systems in 1990 - Traka are now considered as world leaders in innovative technology for sophisticated, intelligent key management systems and lockers solutions to manage and control access to your most important assets. When a conventional key is stolen, mislaid, or accidentally taken home, your security is compromised. Your organisation is suddenly vulnerable. Even if nothing is stolen, and no damage is done, the cost and inconvenience of fitting new locks and the impact on productivity can be significant. Traka can significantly reduce the cost to your organisation of losses through accidental damage, theft, personal injury and downtime.

TRAKA
Key Management

DESCRIPTION

The integration between PACOM Unison and ASSA Abloy Traka allows for extensive key management at facilities such as data centers, healthcare facilities, universities, municipalities, governments and other similar applications. The user presents an access card to a reader in order to open the key cabinet and access a selected key. All actions and events are logged in Unison and can be accessed at any time. Unison can be configured to activate an alarm if a key is not returned to the cabinet on time. In addition, Unison can be programmed to activate an event once a key is borrowed or is returned late.

The Traka integration has support for automatic upload of configuration making it efficient to upload data to user tags or update time schedules.

COMPATIBILITY

| | |
|-----------------------------|--------------------|
| Unison | V5.8 |
| Supported Hardware/Software | Traka 32 2.18.0000 |
| Supported SDK/API | API version 18 |

ORDERING INFORMATION

| PART NUMBER | TYPE CODE | DESCRIPTION |
|-------------|------------|--|
| 110 001 001 | USN-STD | Unison Standard. Includes license for one Unison client workstation. |
| 110 001 002 | USN-ENT | Unison Enterprise. Includes license for one Unison client workstation. |
| 110 002 008 | USN-KEY | Unison Key & Asset Module. Includes support for 25 keys/assets. |
| 110 003 008 | USN-KEY-25 | Unison license for additional 25 keys/assets. |
