

DATASHEET

UNISON ALARM AND ACCESS CONTROL – PACOM 8002

MAIN FEATURES

Received in Unison client

- ▶ All type of alarms
- ▶ Error messages
- ▶ Duress code
- ▶ Output status
- ▶ Input status
- ▶ Alarm area status
- ▶ Voltage error
- ▶ Battery level

Managed from Unison client

- ▶ Users and codes
- ▶ Door environments
- ▶ Access
- ▶ Time schedules
- ▶ Alarm areas
- ▶ Alarm management
- ▶ Macro programming
- ▶ Synchronization of date and time
- ▶ Hardware configuration
- ▶ Battery testing

Supports automatic upload of configuration to Unison.

Unison is a market leading platform for managing integrated alarm and access systems. Unison uses the latest technology and offers a powerful and user friendly solution that suits all types of businesses and organizations.

PACOM UNISON

PACOM Unison is designed to provide easily managed administration of several underlying security systems. Unison cleverly acts as a “bridge” between the integrated alarm and access system and other sub-systems. Unison has support for automatic upload of configuration data. When integrating with an access control system, the task of manually programming hundreds, if not thousands, of different objects is time consuming, repetitive and tedious. Unison intelligently uploads the configuration minimizing data entry and programming errors and significantly speeding up commissioning.

PACOM 8002 CONTROLLER

PACOM 8002 controllers are your best choice for a fully scalable alarm and access control system. PACOM 8002 controllers deliver an optimal, all-in-one building platform that integrates all functionality required for a remote security system. PACOM 8002 controllers handle users, codes, access, time schedules and alarm areas directly from Unison. The modular architecture make PACOM 8002 controllers simple to install, configure, expand and integrate along with your increasing future needs. With a built-in network and intelligent features for intrusion alarm, this unit is a fully integrated security controller.

DESCRIPTION

PACOM 8002 controller supports up to 64 readers, 200 000 local users (with memory module), 256 inputs, 64 outputs, 32 alarm areas.

With built-in networking and intelligent features for alarm handling and access control, this device is a fully integrated security solution approved according to SSF 1014 Alarm class 2 and EN50131-3 Grade 3.

The dual-flash memory allows the software in the control panel to be updated without disruption. This, together with the possibility to scalable handle inputs and outputs with expansion cards, makes PACOM 8002 the ideal choice for an integrated security system.

COMPATIBILITY

PACOM 8002 FW 1.16a
Unison v.5.8

ORDERING INFORMATION

PART NUMBER	TYPE CODE	DESCRIPTION
110 001 001	USN-STD	Unison Standard. Includes support for one Unison client workstation.
110 001 002	USN-ENT	Unison Enterprise. Includes support for one Unison client workstation.
110 002 003	USN-ACM	Unison Access Module. Includes support for 10 doors.
110 003 003	USN-ACM-10	Unison license for 10 additional doors.
110 002 002	USN-ALM	Unison Alarm Module. Includes support for 50 alarm points.
110 003 002	USN-ALM-50	Unison license for 50 additional alarm points.
